

Ready for a deep dive?

All of our creature zones are unique, just like our weird and wonderful underwater world. First, you'll come face to fin with the fish and creatures found in the freshwater streams and lakes of California. Then it's time to visit the San Francisco harbor. Over at Jellyfish Discovery, you'll learn how the ghosts of the ocean hunt their prey.

Head down south to the So Cal Rock Pool and learn from our experts what we can all do to help out the local sea turtles. This is also where you can reach right in and touch a sea star, urchin or anemone.

Whoa! Check out that ray! Look up! It's a shark! That's right, you're now in the Ocean Tunnel. Keep your eyes open because everywhere you turn you'll find some sea creature. But that's not even the end of your exploration. There's still a lagoon with dozens of graceful gliding rays and a kingdom of seahorses to discover.

SEA LIFE TRUST

Protecting The World's Oceans

We're proud to support our partner charity, The **SEA LIFE TRUST**, which works to protect marine life and habitats across the world. Together we've run inspiring campaigns to protect whales from hunting, reduce plastic in the oceans and create new protected ocean areas.

Look out for simple ways you can get involved to protect our oceans and visit sealifetrust.org.
