

## JOB DESCRIPTION

Position Title : Technician – Water Quality

Department : Technical Services

### Scope of work (JOB PURPOSE)

As part of a shift team operating within the water park maintenance department your role is to carry out safe and effective engineering maintenance and statutory inspection of water park amusement devices, associated equipment, water quality, park motor vehicles, mechanized plant and ride buildings via the application of a planned preventative maintenance approach with the aim of maximizing ride and equipment availability and safety in operation.

### Main Responsibilities

- As part of a shift team to work as an operational technician carrying out, planned preventative maintenance, unplanned maintenance, ride start up procedures, safety checks and quality checks of the pool water. To ensure that attractions are handed over to the operation in line with all related safety & park opening times.
- To attend ride breakdowns in a timely manner and to ensure that work is completed safely, efficiently and in line with departmental procedures (SSOW).
- To ensure written documentation relating to pre-opening checks and maintenance works are accurate to reflect changes in procedure. To ensure that you complete PPM documentation in a timely manner in line with department procedures.

### Health & Safety

To take reasonable care for the health and safety of himself and of other persons who may be affected through your work activities.

To cooperate with and support the LEGOLAND Dubai Management to allow the business to fulfill its legal responsibilities through:

- Following reasonable instruction related to health & safety.
- Reporting dangerous situations or deficiencies in health & safety arrangements.
- To only use work equipment in accordance with training.
- To not interfere or misuse anything provided for the purposes for health & safety.

**Disclaimer:** Job descriptions are not exhaustive and the job holder may be required to undertake duties which are in line with but not limited to the above responsibilities

## Qualifications, Experience, & Skills

### Required Qualifications:

- Qualified to at least C&G level 3, or approved equivalent, in either mechanical or electrical engineering supplemented by at least 3 years' experience of working in ideally a theme park environment, or other comparable heavy engineering works.
- Requires a minimum of two (02) years maintenance experience in Water Park.
- Extensive knowledge of Heat exchangers, Water filtration systems in Water Park, Plumbing and water chemistry.

### Required Experience:

### Job-Specific Skills:

- Keeps both guest and Model Citizen Safety the # 1 priority. Accountable for proactively maintaining a safe and enjoyable environment for park guests and employees utilizing resources from local and state resources, and Security/Loss Prevention.
- Responsible for the water quality testing and water park maintenance.
- Ensures and follow the Merlin, LEGOLAND and departmental policies at all times.
- Keeps all tools, machines and all other equipment in clean, safe and good working condition.
- Maintain required records, such as daily checklists, log books and inventory records.
- Carry out water quality related activities to ensure that instructions are followed, deadlines are met, and schedules are maintained.
- Follow all the government and state regulations. Monitors water quality regulatory compliance for LEGOLAND Dubai activities and operations.
- Assists in monitoring of chemicals application in terms of methods, procedures, dosages and health & safety.
- Responsible for the cleanliness of all pools and water features.
- Ensures that all plant rooms, pump rooms, pools and working places are in a **hygienic, clean and safe condition** at all times.
- Responsible for operation and routine maintenance of pump, filtration, water features system, all power tools, motorized equipment and machinery. Notifies management of needed repairs.
- Operates, calibrates, maintains, and properly documents the use of water sampling equipment, monitoring testers; maintains maintenance and calibration records for equipment and test instrumentation.
- Creates and maintains teamwork within department and all other departments.
- Assists other departments on the general maintenance works such as ride maintenance, mechanical, electrical, facilities, LEGO models if needed.
- Perform other duties as assigned.
